

# LUDECKE

Since 1930. The perfect connection.

## Maximum Safety: Series ESIFK DN 7.8

Based on the tried and tested safety quick connect coupling ESMK DN 5, **LUDECKE** now also offers the "big brother": the new series ESIFK DN 7.8.

The coupling system made of brass allows for easy identification of different media circuits and avoids false coupling when using various media and/or diverse pressure levels simultaneously.

This is due to a colour and form coding:

Differently coloured anodised knurled aluminium sleeves on the coupling as well as different coloured anodized aluminium rings on the plug provide a visual identification. In addition, each colour (red, blue, green, brown) has a special coding. This reliably prevents incorrect coupling processes, as only the same-coloured couplings and plugs can be connected.

The series ESIFK comes with the patented OptiFlow by **LUDECKE**® valve technology and guarantees very high flow rates with low pressure drop. Furthermore, it is suitable for low vacuum at low couple force compared to all other compatible products.

The coupling process can be executed in an easy and fast way.

The quick connect coupling is available in various connection types and is ideally suited for applications in industry, machine and plant construction, handcraft, and many more.

by **LUDECKE**

Since more than 90 years, **LUDECKE** is the leading partner for coupling systems to connect flexible fluid lines with tools, machines and industrial equipment.

Since 1949, we have been manufacturing fittings at the headquarters in Amberg for a variety of applications and media, which are distributed worldwide by the technical trade or used by the leading machine manufacturers (OEM) in their own machinery.

We are developing and producing first-class, innovative and sustainable products according to the highest quality standards. The product portfolio is comprised of a comprehensive standard range as well as individual custom item projects.

Thanks to our broad product range, our many years of know-how and our versatile range of services, we always guarantee safe and efficient solutions for your daily work.
