Second row: Andreas Sperl, Mike Renner, Sebastian Koller, Stefan Hartung, Jakob Ertl, Robert Mikalauskas, Christian Kellner, Ludwig Donhauser, Florian Hammer, Wolfgang Liebl

LUDECKE honours Jubilarians

Appreciation and recognition both are core values at **LUDECKE** and firmly established in the company philosophy. Hence, it goes without saying that long-term employees are honoured for their company jubilee.

In the last two years, we have had to make do without these events due to Covid-19. This is why all of our jubilarians were even more delighted when they were invited last week by our management, HR department and works council to celebrate at the restaurant Michl in Oberleinsiedl.

As CEO (as well as jubliarian), Klaus Herdegen thanked all guests for their loyalty and dedication and highlighted how important qualified employees are for the company.

Their long-term experience, the resulting knowledge and growing know-how are an important key factor for the success of **LUDECKE**.

Above all, he is very proud of the good cooperation and information flow between experienced employees and their young colleagues. In this way, long-term knowledge can be passed on and at the same time benefits can be drawn from new ideas.

Every year, **LUDECKE** honours employees who have been with the company for 15, 25 as well as 40 years. Herdegen proudly announced that the latter one is reached quite regularly.

Since more than 90 years, **LUDECKE** is the leading partner for coupling systems to connect flexible fluid lines with tools, machines and industrial equipment.

Since 1949, we have been manufacturing fittings at the headquarters in Amberg for a variety of applications and media, which are distributed worldwide by the technical trade or used by the leading machine manufacturers (OEM) in their own machinery.

We are developing and producing first-class, innovative and sustainable products according to the highest quality standards. The product portfolio is comprised of a comprehensive standard range as well as individual custom item projects.

Thanks to our broad product range, our many years of know-how and our versatile range of services, we always guarantee safe and efficient solutions for your daily work.
