

LUDECKE

Since 1930. The perfect connection.

CEO Andreas Sperl and Klaus Herdegen
Michael Bogner, Ingrid Ehebauer

Farewell after 41 years at **LUDECKE**

Some employees are so integral to a company that their farewell is hard to imagine. After 41 years in service, Ingrid Ehebauer has been sent off to her well-deserved retirement.

Miss Ehebauer has been an integral part of **LUDECKE** since 1981. In her first years, she was a great support to the sales department before she took over as head of purchasing in 1987. Since then she has managed all operative as well as strategic purchasing tasks on national and international level. Due to her technical knowledge and assertiveness, she achieved an excellent reputation in the entire industry. As manager she has made a huge contribution to the continuous growth of **LUDECKE**. Her steady, reliable performance made sure that the manufacturing department as well as the entire company were supplied with all necessary materials and services.

Apart from these important tasks, Ingrid used to be a member of the works council for many years. During this time, she organised numerous events for our employees.

“Today marks the end of a very beautiful but also challenging time” says Ehebauer. “**LUDECKE** has not only been my employer but also an important part of my life. I am happy to have worked with such great colleagues.”

Her tasks have been put in good hands: Mr Michael Bogner. He is partner at **LUDECKE** and after finishing his studies in economics has been working for the company for three years already. From now on, he will take over as head of purchasing and will be supported by the entire purchasing team.

The team **LUDECKE** is deeply thankful and wishes Ingrid Ehebauer good health and all the best for an active retirement.

Since more than 90 years, **LUDECKE** is the leading partner for coupling systems to connect flexible fluid lines with tools, machines and industrial equipment.

Since 1949, we have been manufacturing fittings at the headquarters in Amberg for a variety of applications and media, which are distributed worldwide by the technical trade or used by the leading machine manufacturers (OEM) in their own machinery.

We are developing and producing first-class, innovative and sustainable products according to the highest quality standards. The product portfolio is comprised of a comprehensive standard range as well as individual custom item projects.

Thanks to our broad product range, our many years of know-how and our versatile range of services, we always guarantee safe and efficient solutions for your daily work.
